

Ivanti Mobile Device Management

Unified Endpoint Management (UEM)

- Allow compliant devices to access corporate email, apps and data.
- Secure data-in-transit between mobile device and corporate network.
- Separate business from personal using containers.
- Enforce risk-based policy.

GITEX Offer			
License	Price	Perpetual License	Maintenance
Secure UEM (3 year's Maintenance)	\$1.7 per month/Device	✓	✓
Secure UEM (2 year's Maintenance)	\$2.24 per month/Device	✓	✓

Mobile device management and security

- **Mobile device management (MDM)** - Secure and manage endpoints running Apple iOS and Google Android operating systems. **Available on-premises and as a cloud service.**
- **Easy onboarding** - Leverage services such as Apple Device Enrollment Program (DEP), Android zero-touch, or Samsung KNOX mobile Enrollment to provide users with the simplest user onboarding process.
- **Mobile app distribution and configuration** - Apps@Work, a customizable enterprise app storefront, combined with Apple Volume Purchase Program (VPP) facilitates the secure distribution of mobile apps. In addition, capabilities such as iOS managed apps and Android Enterprise allow for easy configuration of app-level settings and security policies.
- **Secure email gateway** - MobileIron Sentry, an in-line gateway that manages, encrypts, and secures traffic between the mobile endpoint and back-end enterprise systems.

Secure productivity

- **Secure email and personal information management (PIM) app** – MobileIron Email+ is a cross-platform, secure PIM application for iOS and Android. Security controls include government-grade encryption, certificate-based authentication, S/MIME, application-level encryption, and passcode enforcement.
- **Secure web browsing** - Web@Work enables secure web browsing by protecting both data in motion and data at rest on the endpoint. Custom bookmarks and secure tunneling ensure that users have quick and safe access to business information.
- **Secure content collaboration** - Docs@Work allows users to access, create, edit, markup, and share content securely from repositories such as SharePoint, Box, Google Drive, and more.
- **Mobile app containerization** – Deploy the AppConnect SDK or app wrapper to provide an additional layer of security for your inhouse mobile apps or choose from our ecosystem of AppConnect integrated apps.
- **Derived Credentials** – Support two-factor authentication using common access cards (CAC) and personal identity verification (PIV).

Desktop management and security

-  **Windows 10 management** – Unified platform to manage modern Windows endpoints using a combination of Windows MDM APIs and traditional group policy objects.
-  **Mac management** – Manage macOS endpoints using state-of-the-art MDM APIs that allows for seamless enrollment, app distribution, and lifecycle management for Macs.

Note:

- Availability of certain features and functionality depends on the deployment type – on-premises vs SaaS.
- Availability might vary based on operating system and device type.
- ServiceConnect integrations available with the Platinum bundle includes MobileIron developed software to integrate with specific third-party products and services. API-based integrations do not require the purchase of the Platinum bundle.

About Ivanti

Ivanti makes the Everywhere Workplace possible. In the Everywhere Workplace, employees use myriad devices to access IT networks, applications and data to stay productive as they work from anywhere. The Ivanti automation platform connects the company's industry-leading unified endpoint management, zero trust security and enterprise service management solutions, providing a single pane of glass for enterprises to self-heal and self-secure devices, and self-service end users. More than 40,000 customers, including 78 of the Fortune 100, have chosen Ivanti to discover, manage, secure and service their IT assets from cloud to edge, and deliver excellent end user experiences for employees, wherever and however they work.
